

Job Description: Data Analyst

Location: Bangalore

Carrier is a leading provider of heating, ventilating, air conditioning and refrigeration systems, building controls and automation, and fire and security systems lead to safer, smarter, balanced, and high-performance buildings.

Carrier's Digital Products and Software team is building solutions to reimagine systems that shape the way we live, work, and play. We're setting the standard for healthier, safer, and more resilient built environments – and connecting the cold chain to improve the process of safely shipping and storing food and critical medical supplies.

Description:

A Data Analyst plays a pivotal role in transforming raw data into actionable insights. The role involves gathering data from various sources, including databases and spreadsheets, and cleaning and preprocessing it to ensure accuracy and relevance. Using statistical tools and software, the Data Analyst analyzes data sets to identify trends, patterns, and correlations.

The Data Analyst creates detailed reports and dashboards to present findings, using visualization tools like graphs, charts, and infographics to make data easily understandable. Collaboration with cross-functional teams is essential to understand their data needs and provide insights and recommendations based on the analysis.

Primary Responsibilities:

- Collect, clean, and organize data from various sources.
- Perform data analysis using statistical techniques and provide reports.
- Identify trends, patterns, and correlations in complex data sets.
- Develop and maintain databases, data systems, and data collection processes.
- Create visualizations and dashboards to present data insights.
- Collaborate with cross-functional teams to understand data needs and deliver solutions.
- Assist in the development and implementation of data-driven strategies.

Job Description: Data Analyst

Required Skills:

- Strong analytical and problem-solving skills.
- Excellent attention to detail and accuracy.
- Good communication and teamwork abilities.
- Ability to manage multiple tasks and meet deadlines.
- Eagerness to learn and adapt to new technologies and methodologies.

Tools/Training:

- Proficiency in Microsoft Excel and SQL Basics.
- Familiarity with data visualization tools such as Tableau or Power BI.
- Basic understanding of programming languages like Python or R.
- Familiarity with Pandas.

Education & Certification:

- Bachelor's degree in engineering (BE/BTech) in Computer Science, Information Technology, Data Science, or a related field.
- Certifications on Basic SQL, Python, Data Visualization.
