

Anuchana Vinod

Data Analyst

SUMMARY

Results-driven Data & BI Analyst skilled in transforming raw data into actionable business insights using Power BI, SQL, Python, and Excel. Experienced in optimizing ETL pipelines, automating reporting workflows, and delivering high-impact dashboards. Strong communicator with hands-on exposure to cloud ecosystems like Azure Data Factory and Databricks, enabling end-to-end analytics solution delivery.

KEY ACHIEVEMENTS

- Automated validation processes, enhancing reporting accuracy by 25%
- Improved SQL performance, reducing query execution time by 30%
- Increased revenue forecasting accuracy by 15% via statistical analysis
- Built BI dashboards that reduced manual reporting time by 20–30%
- Achieved All India Best Cadet (NCC) – national-level recognition for excellence

SKILLS

- Data Analysis & Reporting:** Power BI, SQL, Excel (Advanced), Python (Pandas)
- Data Engineering & Cloud:** Azure Data Factory, Databricks, PySpark
- Core Competencies:** ETL Optimization, Data Quality Automation, Stakeholder Communication
- Tools:** Git, PowerPoint, MS Word

PROJECTS

Customer Churn Prediction & Value Analysis | Python, SQL, Power BI, scikit-learn, PQL (exposure)

- Built churn prediction models with 75% accuracy, enabling targeted retention campaigns across 10K+ customers
- Visualized churn drivers in Power BI dashboards, helping stakeholders identify top attrition factors
- Proposed retention strategies that improved customer retention by 10%
- Documented workflows for reproducibility and future scaling
- Applied Celonis PQL concepts to explore process-level churn drivers

Monthly Retail Regional Analysis | Power BI, SQL, Azure Data Lake

- Designed interactive dashboards for regional sales, reducing reporting cycle time by 30%
- Partnered with retail stakeholders to recommend initiatives that drove 7% revenue uplift
- Delivered presentations to senior managers, displaying actionable insights

Legacy Database Consolidation & Migration | ADF, PySpark, Databricks, SQL

- Migrated 6+ legacy databases into a centralized cloud system
- Configured ETL pipelines in Azure Data Factory and executed PySpark transformations across 10M+ records
- Improved query efficiency by 35% and reduced redundancy by 40%, accelerating downstream analytics
- Implemented governance checks to ensure accuracy and reliability

EXPERIENCE

Trainee Decision Scientist - Mu Sigma

Tenure: Oct 2024 – Aug 2025

- Engineered Power BI dashboards and SQL reports, reducing manual analysis time by 20%
- Optimized ETL workflows in Azure Data Factory and PySpark, processing datasets exceeding 10M records
- Developed SQL query optimization strategies, reducing execution time by 30%
- Conducted exploratory and statistical analyses, improving revenue forecasting accuracy by 15%
- Automated validation checks across multiple sources, improving reporting accuracy by 25%
- Collaborated with cross-functional teams to deliver end-to-end analytics projects, emphasizing stakeholder communication and value delivery

Business Development Executive (Stock Marketing) - Equiscan Research

Tenure: Sep 2024 – Oct 2024

- Engaged with clients in the stock marketing domain, presenting tailored investment research solutions
- Built relationships with prospective investors and stakeholders, strengthening trust and influencing decision-making
- Delivered persuasive presentations and product demonstrations, showcasing value propositions in financial services

CERTIFICATION

- AI Fundamentals for All (udemy)
- Kiro (Udemy)
- AWS Cloud practitioner certification (Udemy)
- The Complete SQL Masterclass 2026(Udemy)
- Complete Microsoft Power BI Bootcamp (Udemy)

EDUCATION

- Bachelor of Technology in Information Science Engineering, JAIN University, Faculty of Engineering & Technology | 2024
