

Job Description: BI Engineer

Location: Bangalore

Carrier is a leading provider of heating, ventilating, air conditioning and refrigeration systems, building controls and automation, and fire and security systems leading to safer, smarter, balanced, and high-performance buildings.

Carrier's Digital Products and Software team is building solutions to reimagine systems that shape the way we live, work, and play. We're setting the standard for healthier, safer, and more resilient built environments – and connecting the cold chain to improve the process of safely shipping and storing food and critical medical supplies.

Description:

The BI Engineer will be responsible for designing, developing, and maintaining BI solutions that provide actionable insights to support business decision-making processes.

A BI Engineer will work closely with data analysts, data scientists, and business stakeholders to understand their data needs and deliver high-quality BI solutions. Will use modern BI tools and technologies, contributing to the continuous improvement of our data infrastructure and reporting capabilities.

Primary Responsibilities:

- Design, develop, and maintain BI solutions, including data models, dashboards, and reports.
- Collect, clean, and integrate data from various sources to ensure data accuracy and consistency.
- Perform data analysis to identify trends, patterns, and insights that support business decisions.
- Collaborate with cross-functional teams to understand business requirements and translate them into technical specifications.
- Optimize and enhance existing BI solutions to improve performance and usability.
- Ensure data security and compliance with data governance policies.
- Provide support and training to end-users on BI tools and solutions.

Job Description: BI Engineer

Required Skills:

- Detail oriented – visualize the big picture and break it down into small, digestible chunks
- Strong analytical and problem-solving abilities.
- Excellent attention to detail and accuracy.
- Effective communication and teamwork skills.
- Ability to manage multiple tasks and meet deadlines.
- Eagerness to learn and adapt to new technologies and methodologies.

Tools/Training:

- Proficiency in Microsoft Excel and SQL Basics.
- Familiarity with data visualization tools such as Tableau or Power BI.
- Basic understanding of Snowflake.

Education & Certification:

- Bachelor's degree in engineering (BE/BTech) in Computer Science, Information Technology, Data Science, or a related field.
- Relevant certifications (e.g., Microsoft Certified: Data Analyst Associate, Tableau Desktop Specialist) are a plus.
